recent stock market crises are exacerbated by investors who don't understand what has been happening to companies because investors lack an understanding of financial ratio analysis. Stock markets are efficient in that they incorporate and even anticipate information about companies based on financial accounting data provided by companies. However, market efficiency results from extensive analysis performed by financial analysts. Much of this financial analysis is based on the analysis of financial information provided by companies and analyzed using financial ratio analysis. This book provides a step-by-step demonstration of how to download data from internet sources, transfer the data to a spreadsheet, and conduct a financial ratio analysis of any company. The book outlines the steps needed to perform a financial ratio analysis: the financial statements to be retrieved from Edgar and the five categories of financial ratios used in the financial analysis of the company; the data retrieved from the financial statements is copied to a worksheet and used to compute and graph the financial ratios; the ratios and graphs are used to determine the performance drivers of this company.

The only local text in the market, *Business Analysis and Valuation* provides a framework for understanding and using financial statements for business students and practitioners developed specifically for students undertaking accounting valuation subjects. The text is unique in its approach, which introduces and develops a framework for business analysis and valuation using financial statement data, then shows how to apply this framework to a variety of decision contexts. All chapters of this edition have been updated to include the latest regulations, practices, and examples from both the financial markets and research. Industry insights from practitioners and other experts have been added to each chapter, giving students a practical, real-life understanding of how the content they are learning translates to the workplace. With an increased number of real business Asia Pacific case studies exploring various issues, including a running chapter example and references to recent research in this field, the text offers local context and a practical and in-depth approach.

*Financial Statement Analysis* 9e emphasizes effective business analysis and decision making by analysts, investors, managers, and other stakeholders of the company.
