how can a group be empowered to improve their ability to make
decisions while also reinforcing the group s intended values
beliefs and behaviors like positive reinforcement which
introduces a desirable or pleasant stimulus after a behavior has
been completed and has been found to be effective for
reinforcing such behavior serious games introduce the behavior
as a pleasant experience through engagement and entertainment
where positive reinforcement relies heavily on the willpower of
the subject to complete the behavior on their own serious games
introduce a motivational factor from the beginning of the
behavior serious games are designed for purposes other than
entertainment such as training learning creating awareness or

behavior transformation through the introduction of content topics narratives rules and goals they are immersive engaging and enjoyable which enhances motivation and learning the development of serious games is grounded in theoretical backgrounds such as motivation constructivism flow experience problem based learning and learning by doing this method has been used in a variety of industries including education healthcare military policy analysis and business functions such as marketing or financial purposes they facilitate problem solving through challenges and rewards and use entertainment and engagement components serious games can address specific skills for many domains foster collaboration provide risk free environments and be used as analytical tools for educational research they reinforce intended values beliefs and behaviors of players while conveying knowledge skills and attitudes providing an integrated and effective approach to the transformation of an individual group or organization the handbook of research on decision making capabilities improvement with serious games discusses the use of advanced technologies including extended and immersive reality digital twins augmented reality ar virtual reality vr mixed reality mr and iot sensors to improve decision making skills and learning through serious games this book discusses user engagement game adaptation content adaptation and sensor technology it showcases how to increase decision making skills in individuals and organizations and incorporates the latest developments in artificial intelligence and machine learning led by experts with over 20 years of experience and covering topics such as serious game design intelligent content adaptation and machine learning algorithms this book is designed for professionals in education instructional designers curriculum developers program developers administrators educational software developers policymakers researchers training professionals privacy practitioners government officials consultants it researchers academicians and students
